## Front-End Developer

Results-driven Front-End developer with **1 year hands-on experience** creating scalable web applications using **HTML, CSS, JavaScript, and React.js**. Proficient with **REST APIs**, seeking a dynamic role in a fast-paced company valuing hard work, dedication, and continuous technical skill evolution.

## Technical Skills

| | | |
|---|---|---|
| **Languages** | : | JavaScript, HTML, CSS, Node.js |
| **Frameworks** | : | React.js |
| **UI Libraries** | : | Material UI, Bootstrap |
| **Version Control** | : | Git |
| **Dev Tools** | : | Visual Studio Code, Postman |
| **Design Tool** | : | Figma |
| **Collaboration Tool** | : | Jira |

## Experience

**Consultant**                                                                                          Nov 2022 – Nov 2023
*L&T Technology Services (LTTS)*                                                       *Bengaluru, India*

- Spearheaded the development of a dynamic and responsive web application on a remote test orchestration platform, employing a tech stack encompassing **HTML, CSS, JavaScript, and React.js**.
- Collaborated seamlessly with UX/UI designers to translate wireframes and design mockups into fully functional code, ensuring a seamless user experience.
- Developed secure user authentication for encrypting passwords for login and sign-up
- Implemented a user profile picture feature that converts images to binary and uploads them to AWS through API.
- I incorporated a user-friendly interface within the application, seamlessly connected to Jira using its APIs. This allows users to perform various Jira actions directly from our application.
- Worked closely with back-end developers to integrate user-facing elements with server-side logic, reducing integration time.
- Have written the testable & efficient code with overall coverage of 90% or above.
- Showcased adept bug-fixing skills, ensuring platform stability.

## Education

**Yogananda Institute of Technology and Science**                        Tirupati, Andhra Pradesh
*Bachelor of Technology*                                                                       *Jul 2019 – Jul 2022*
CGPA - 6.8

## Project

**EvQUAL**                                  *React.js, JavaScript, Git*                      Jan 2023 - Oct 2023
**Client : NBCUniversal**

EvQUAL is a Cloud enabled Remote Test Orchestration Platform that integrates automated and manual testing of apps, players, devices, streams and networks. For organizations, across Consumer Electronics, Media & Entertainment, Telecom, Automotive, Industrial, Medical and other verticals.

- * Architected and implemented sleek web applications, leveraging **HTML, CSS, JavaScript and React,js** to deliver a polished user interface.
- * Optimized application **performance, prioritizing speed** and an intuitive user experience for diverse devices through **responsive design** principles
- * Actively collaborated within an **Agile team**, ensuring seamless communication and **efficient project delivery.**
